

PAJERO

love that car

LOVE THAT CAR

Here at Mitsubishi, we love our cars. We love their superior quality, what they stand for, and what they're capable of. And we want you to feel the same way. It's why we strive for the highest standards in everything we do, and it's why we back all our vehicles with our Mitsubishi Diamond Advantage, Australia's Best New Car Warranty, Capped Price Servicing and Customer Care.

Mitsubishi delivers the latest and greatest in 4WD technology, style, sophistication and unquestionable reliability, giving you the confidence to go anywhere and take on almost anything. Whether you need a tough workhorse, serious off-roader or a more premium luxury model, Mitsubishi's leading range of rally-proven vehicles has the 4WD for you. Without a doubt we believe the Mitsubishi Pajero will make all other 4WDs seem second best.

OUR PROMISE

When you buy a Mitsubishi Pajero or any vehicle from our range, you're buying a vehicle that's backed by world-class research, technical innovation, and leading performance. In every area of our business we're continually focussed on four key values, we never fail to create superior vehicles that people love.

STREET PRESENCE

We'll design attention-grabbing vehicles with real street presence and genuine performance.

ADVANCED TECHNOLOGY

We'll continue to develop ground-breaking technology that focuses on better control, performance and lifestyle. This includes innovations such as our MIVEC engine technology, our intercooler-turbocharged diesel engine and our leading Mitsubishi Multi Communication System.

DRIVER CONFIDENCE

We're committed to raising the bar in terms of safety, which gives peace of mind to all occupants. Our Mitsubishi Reinforced Impact Safety Evolution (RISE) body design remains at the heart of our vehicle safety philosophy.

SUPERIOR VALUE

We'll constantly strive to deliver the ultimate customer experience at all times. This is reflected by the Mitsubishi Diamond Advantage, Australia's best new car warranty, capped price servicing and customer care, by our feature-packed vehicles, and our ongoing commitment to making our vehicles more cost effective and fuel efficient.

ADVENTUROUS PAJERO

The Mitsubishi Pajero has been part of Australia's greatest adventures since 1983. From Uluru to the Bungle Bungles, and, more importantly, back again.

The Pajero boasts advanced, powerful, fuel-efficient engines through a 3.8 litre MIVEC petrol and a powerful 3.2 litre Common Rail turbo diesel.

All Pajeros are equipped with MATT™ (Mitsubishi All Terrain Technology), and a multitude of advanced driver confidence systems.

Pajero also boasts a tough RISE (Reinforced Impact Safety Evolution) monocoque body design for outstanding protection plus the availability of safety features such as side and curtain SRS airbags, reversing sensors and reversing camera.

Every innovation has been developed so you can enjoy a better driving experience; from the hard-working GL and GLX, the stylish GLS, to the sporty VRX, and the luxury of the premium Exceed model, every Pajero delivers high levels of advanced technology and driver confidence systems.

Specifications and features may vary by model. Please refer to Specifications Booklet enclosed or mitsubishi-motors.com.au for full information.

STATE OF THE ART INTERIOR

Take a look at the luxury interior of the Pajero and ask yourself if this isn't how you want to enjoy your next on-road-off-road adventure. Everything is at your fingertips.

And your passengers will be more comfortable too, with state of the art entertainment and climate control to make long trips more enjoyable. For everyone.

MULTI-MEDIA SYSTEM

Long family drives just got shorter with a 9" full-colour panoramic screen, which includes two infrared cordless headphones so your rear passengers can watch a DVD and not bother other passengers. They can even plug into an auxiliary jack that is compatible with multi-media devices such as game consoles and digital cameras.

SPORTS INSTRUMENTATION

The Pajero boasts stylish blue illuminated dials that are aeronautically inspired.

POWER AND PERFORMANCE

The people, the journey. These are our inspiration, our driving force for the latest and greatest technology. Every next-generation innovation has been developed so that both driver and passengers enjoy an improved Pajero driving experience.

With a choice of two powerful, efficient engines, Pajero has never been better equipped for your off-road and on-road adventures.

COMMON RAIL TURBO DIESEL ENGINE

The very latest in diesel engine technology delivers power without compromise. The 3.2 litre Common Rail turbo-charged diesel yields not only next generation quietness, smoothness, fuel efficiency and emission reduction through an advanced common rail system, but delivers 147kW of power and 441Nm of grunt torque.

MIVEC ENGINE

The 3.8 litre V6 MIVEC engine (Mitsubishi Innovative Valve timing and lift Electronic Control) offers the latest technology with a lighter engine and intelligent valve timing technology to deliver improved fuel efficiency and lower emissions, while providing improved driveability. The MIVEC engine matches your driving style to minimise fuel consumption at lower revs while increasing air flow at high revs for greater performance up to an awesome 184kW.

TOWING CAPACITY

Pajero's impressive power and torque ensure you can tow your boat, caravan or trailer with supreme confidence thanks to a mammoth 3000kg* towing capacity.

* Subject to state regulations and towbar designs. A Weight Distribution Hitch (WDH) is recommended for towball downloads exceeding 135kg. For further information, please refer to the Pajero Owner's manual.

ADVANCED TRANSMISSIONS

Pajero offers a choice of intelligent transmissions perfectly matched to your preferred driving style. A smooth-shifting 5-speed, all synchromesh manual gearbox available on the turbo diesel delivers ultimate hands-on driving experience.

Or if you prefer automatic, the INVECS II 'Smart Logic' 5-speed automatic transmission with Sports Mode mated up to the 3.8 litre V6 or the turbo diesel will be sure to provide the control you need.

MANUAL TRANSMISSION

SPORTS MODE AUTOMATIC TRANSMISSION

Sports Mode allows you to manually shift gears without using a clutch. The advantage is that this clutch-free operation reduces rev and torque loss usually associated with engaging gears, maintaining precious momentum in off-road situations.

COMPARISON OF SHIFT RESPONSE

5-SPEED AUTOMATIC WITH INVECS II
'SMART LOGIC'

To provide smoother shifting, the INVECS II 'Smart Logic' transmission system's on-board computer learns and adapts to each driver's preferences by recording engine and foot braking data. The control logic then adapts the gearshift timing to suit the driver's style. You'll have effortless acceleration and a more predictable ride.

ADAPTIVE SHIFT CONTROL GOING DOWNHILL

ADAPTIVE SHIFT CONTROL DURING ACCELERATION

MATT: MITSUBISHI ALL TERRAIN TECHNOLOGY

All Pajero models are equipped with Mitsubishi's MATT™ (Mitsubishi All Terrain Technology) – the latest in superior 4WD technology.

MATT
MITSUBISHI ALL TERRAIN TECHNOLOGY

Mitsubishi All Terrain Technology (MATT™) delivers outstanding off-road control and superior on-road safety and handling. MATT™ operates using intelligent sensors which constantly monitor your vehicle's wheel speeds, g-forces and yaw rates. Pajero's computer then processes this data and matches it to driver intentions via steering wheel and throttle sensors to provide optimum driving performance.

MATT™ incorporates the following advanced systems to enhance your driving control:

- Active Stability Control (ASC)
- Active Traction Control (ATC)
- Engine Brake Assist Control (EBAC)
- Super Select 4WD II
- Multi-mode Anti-lock Braking System (ABS)
- Electronic Brakeforce Distribution (EBD)
- Rear diff lock (optional)
- Mitsubishi Body Optimised Suspension (MBOS)

MULTI-MODE ANTI-LOCK BRAKING SYSTEM (ABS)

Pajero's intelligent 4-channel, 4-sensor braking system monitors wheel speeds and activates brakes to individual wheels to allow superior manoeuvring around objects under heavy braking conditions.

ACTIVE STABILITY CONTROL (ASC)

Automatically recognises under-steer and over-steer, and applies braking to the diagonal wheel to maintain stability and control through corners.

ELECTRONIC BRAKEFORCE DISTRIBUTION (EBD)

Stopping distances are reduced as EBD detects when you are carrying heavier loads and automatically increases rear-braking force.

STOPPING DISTANCE WITHOUT EBD

ACTIVE TRACTION CONTROL (ATC)

ATC prevents driving wheels from spinning by sensing loss of traction in an independent wheel and applying braking force to that wheel and sending extra power and torque to other wheels.

ENGINE BRAKE ASSIST CONTROL (EBAC)

EBAC gives you superior control on steep descents because you won't be losing engine braking and traction due to slipping wheels. This system works automatically when descending slopes in 4LLc mode.

FORDING DEPTH 700mm

SUPER SELECT 4WD II

Pajero lets you alternate between 2WD and 4WD modes – the choice of around town fuel efficiency and off-road traction. You can change between modes at speeds of up to 100 kilometres per hour on any surface.

2H (2WD HIGH RANGE)

2H shifts you into rear-wheel drive for fuel-efficient performance.

4H (FULL-TIME 4WD)

Get added traction in 4H mode. The dynamic front/rear torque split adjusts between 33:67 and 50:50 for greater control in high-speed driving.

REAR DIFF LOCK

Pajero has optional rear diff lock providing superior traction for heavy duty four wheel driving. With the rear diff locked, both rear wheels receive the same amount of driving force regardless of surface to provide the maximum possible traction.

4HLc (4WD HIGH RANGE WITH LOCKED CENTRE DIFFERENTIAL)

In rugged or slippery conditions, 4HLc distributes power equally to all four wheels to meet off-road challenges.

4LLc (4WD LOW RANGE WITH LOCKED CENTRE DIFFERENTIAL)

Switch to 4LLc when you need tractor-like crawling power. Maximised low-end torque pulls you through the roughest terrain.

INDEPENDENT MULTI-LINK REAR SUSPENSION

Pajero boasts independent multi-links with coil springs combined with increased suspension travel and track. The result is maximum tread contact on rough terrain and a reduction in understeer.

FRONT SUSPENSION

REAR SUSPENSION

FOUR WHEEL VENTILATED DISC BRAKES

Large disc brakes provide better stopping power, and, combined with 17" or 18" alloy wheels, enable true off-road capability.

NEXT GENERATION TECHNOLOGY

Next-generation communications and entertainment technology have been incorporated inside the cabin to enhance your Pajero journey. Sit back and enjoy.

MITSUBISHI MULTI COMMUNICATION SYSTEM (MMCS)

MMCS gives you total control over everything you need, all in one place and all easily accessible via the 7" full colour in-dash touch screen. It really is the ultimate total control system, with:

SATELLITE NAVIGATION

Always find your way with the easy touch screen satellite navigation system. You can store frequently used addresses and search for points of interest like local restaurants, hotels or service stations.

REVERSING CAMERA

The driver's rear field of view can be seen on screen when the reverse gear is engaged. Combined with reversing sensors, it makes parking a breeze.

IPOD INTEGRATION*

While your iPod is charging in the glovebox, you can access and control all of its music through the MMCS touch screen's iPod interface.

DVD PLAYER

As you drive, the rear passengers can watch a DVD which is controlled from MMCS. When the car is stationary, DVDs can be viewed from both the front and rear seats.

AUDIO INTEGRATION WITH ROCKFORD ACOUSTIC DESIGN™ PREMIUM AUDIO SYSTEM

Getting the sound just right is easy with pre-set equaliser styles like rock, pop and jazz; you can also set your own. There are even surround sound modes to create effects such as cinema, live, club and studio for a superior audio experience.

BLUETOOTH® HANDS-FREE PHONE CONNECTIVITY

Pajero has the latest hands-free phone system technology. Bluetooth® phone connectivity is streamed through the vehicle's audio system so you can make and receive calls at the touch of a button while staying focused on the road.

*iPod device not included

ROCKFORD ACOUSTIC DESIGN™ PREMIUM AUDIO SYSTEM

Delivering a massive 860 watts with 12 surround-sound Dolby 5.1 channel speakers and an integrated 10" subwoofer which can be controlled from the steering wheel. Pajero has the sound to match its looks.

BLUETOOTH® 2.0 MUSIC STREAMING

Bluetooth® 2.0 is also integrated through the audio system and allows the driver to stream music wirelessly.

MULTI-FUNCTION DISPLAY

Actively monitoring your journey, Pajero's multi-function display can provide endless information about your environment. A barometer to help track weather conditions and keep you comfortable, an altimeter to show you how high you've climbed, a compass to point you in the right direction and average vehicle speed and fuel consumption calculations to name a few.

REAR-ENTERTAINMENT DVD SYSTEM

Why should the driver have all the fun? Pajero rear-seat passengers can enjoy sophisticated in-car entertainment with their very own DVD player and 9" full-colour screen. Game console compatible, it includes two infrared cordless headphones. As passengers watch a DVD, the rest of the car can listen to music, or simply tune out and take in the surrounding scenery.

DUSK SENSING HEADLAMPS

Pajero boasts dusk sensing headlamps, which help you stay focused on the road at all times. A sensor on the windscreen automatically sends a signal to your lights and they will turn on when it gets dark or when you're travelling through a tunnel.

AUTO RAIN SENSING WIPERS

Pajero also comes equipped with premium technology like rain sensing wipers. A sensor automatically detects moisture on the windscreen and according to the amount of rain present the system will activate the wipers at the appropriate speed.

VERSATILITY

FLEXIBLE SEATING

Pajero comfortably seats seven people. The third row seats can be completely removed, or simply fold and store under the rear floor, providing greater rear cargo storage.

TECHNOLOGY DESIGNED TO SAVE LIVES

Pajero is designed with both driver and passenger safety front of mind.

RISE MONOCOQUE BODY

Mitsubishi's RISE (Reinforced Impact Safety Evolution) monocoque body system with integrated chassis is a highly rigid one-piece shell that has come through the punishing ups and downs of the world's toughest rally. In the event of an accident, the super-strength cabin's impact-absorbing crushable zones minimise impact to passengers. Reinforced critical points increase stability for handling and the RISE body also provides strength for recovery and towing.

MONOCOQUE BODY INCORPORATING STRAIGHT FRAMES WITH LARGE CROSS SECTIONS

HIGH RIGIDITY DECK

The highly rigid construction of the A-pillars and deck minimises backward movement of the steering column, reducing injury to the driver.

REAR STRAIGHT FRAMES

Rear straight frames absorb energy combined with the highly rigid tailgate area to protect passengers in the rear.

LARGE BODY JOINT REINFORCEMENTS

Large reinforcements to each body joint significantly increases rigidity of joints.

CRUSHABLE ZONES

Two crushable zones in front and behind the engine absorb and dissipate collision energy.

DRIVER AND PASSENGER SRS AIRBAGS

Standard Supplementary Restraint System (SRS) airbags on all models provide essential protection in the event of a frontal collision.

SIDE AND CURTAIN AIRBAGS

For optimal protection of driver and passengers – front and back – in the event of a side-on collision. The side airbags inflate from the side of the seat and the curtain airbags activate from the roof.

VISIBILITY CONCEPT

Mitsubishi's visibility concept combines many features to give you greater visibility while ensuring other drivers are aware of your Pajero on the road.

REVERSING CAMERA

Part of the Mitsubishi Multi Communication System, Pajero's reversing camera supports the driver's rear field of view, automatically appearing on screen when the reverse gear is engaged. It makes parking easy and offers increased safety and peace of mind when you're backing in or out of driveways.

CENTRALLY MOUNTED SPARE WHEEL

The spare wheel is centred and in a lowered position providing greater rearward visibility. Reversing sensors and a reversing camera give you confidence when reversing.

SIDE INDICATOR LIGHT

Integrated turn indicators on large exterior rear view mirrors provide greater visibility and clear indications to other road users of your actions.

HIGH INTENSITY DISCHARGE HEADLAMPS

Pajero takes visibility to the next level with High Intensity Discharge (HID) headlamps providing optimal night time visibility with a wide view and a bright, daylight-type illumination. Headlamp washers ensure maximum visibility is maintained.

Overall width	1,875
Track – front	1,570
Track – rear	1,570
Wheelbase	2,780

¹ These figures are obtained from controlled laboratory tests conducted by Mitsubishi Motors to Australian Design Rule ADR81/02 and are provided to assist you in comparing the fuel consumption of Pajero with other vehicle's. The actual fuel consumption you achieve will depend, however, on many factors, including your driving habits, the prevailing conditions and your vehicles equipment, condition and use.

² The tyres fitted to Pajero as standard equipment are designed primarily for use on sealed roads. If your Pajero is to be driven primarily on unsealed roads, please consult your Mitsubishi dealer for advice on suitable tyre choices.

³ Payload includes occupants, fuel and fitted options (if any). The weight of these must be deducted from payload to determine actual load carrying capacity. Front and/or rear axle loads must not be exceeded.

⁴ Subject to state regulations and towbar designs. A Weight Distribution Hitch (WDH) is recommended for towball downloads exceeding 135kg. For further information, please refer to the Pajero owner's manual.
